Body Block

Patient Positioning Device

*Simply flip it
for a different support height*

What can Bodyblock be used for ?

A head, arm, leg and foot support, ideal for use in the treatment of patients by podiatrists, chiropractors, physiotherapists, osteopaths, paramedics and other medical professions. Comfortable, portable and easy to clean; the different heights and curves of Body Block have many practical applications

Bodyblock fills the gap in the market for a hygienic multidisciplinary, multipurpose support block. Its versatility is on account of different heights on each of its 4 sides creating different elevations. Bodyblock can be used to support the head, legs, heels or arms and can also be used as knee spacer. It has applications within the health, beauty and exercise sectors and has the advantage of making the practitioner's task easier whilst keeping the client or patient comfortable and in an optimum position.

Bodyblock

Patient Support Block

Bodyblock is made of polyurethane with in a disinfectable skin and is CE marked. The most practical way a bodyblock can be cleaned is with surface medical disinfectant sprays or cliniwipes but it can also be autoclaved or put in the dishwasher. It's so light it floats like a cork, weighing only 300g, yet robust enough to elevate the heaviest limbs.
